“

**LIFE ISN'T ABOUT FINDING
YOURSELF. LIFE IS ABOUT
CREATING YOURSELF.”**

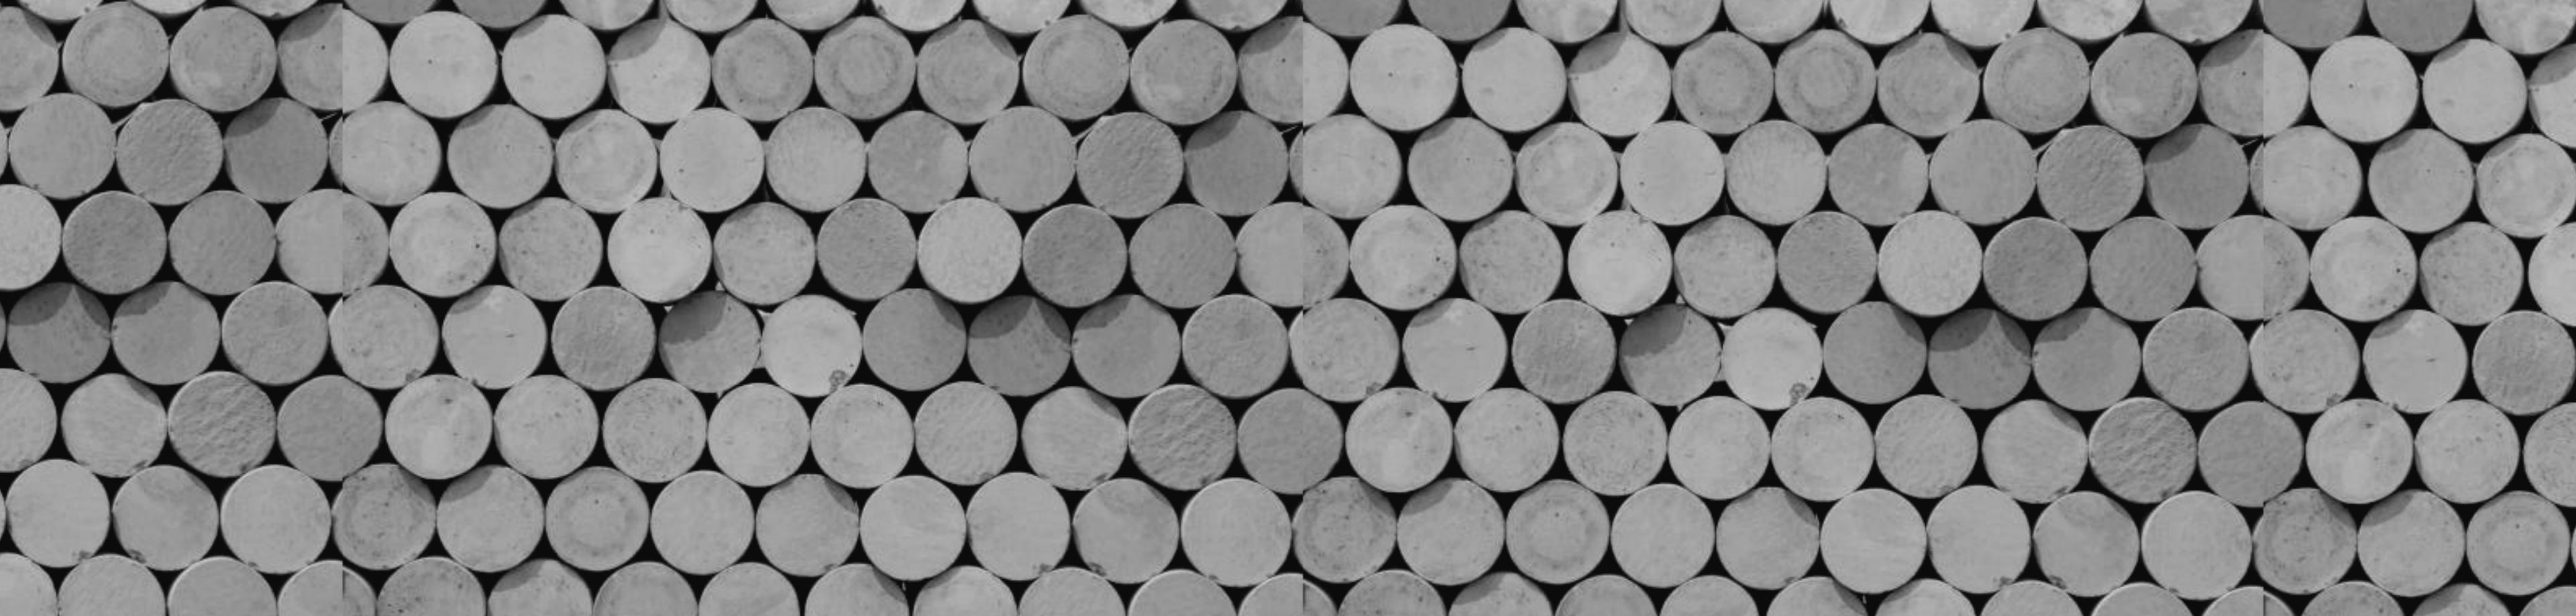

-GEORGE BERNARD SHAW

**“SUCCESS IS SOMETHING
YOU ATTRACT BY THE
PERSON YOU BECOME.”**

-JIM ROHN

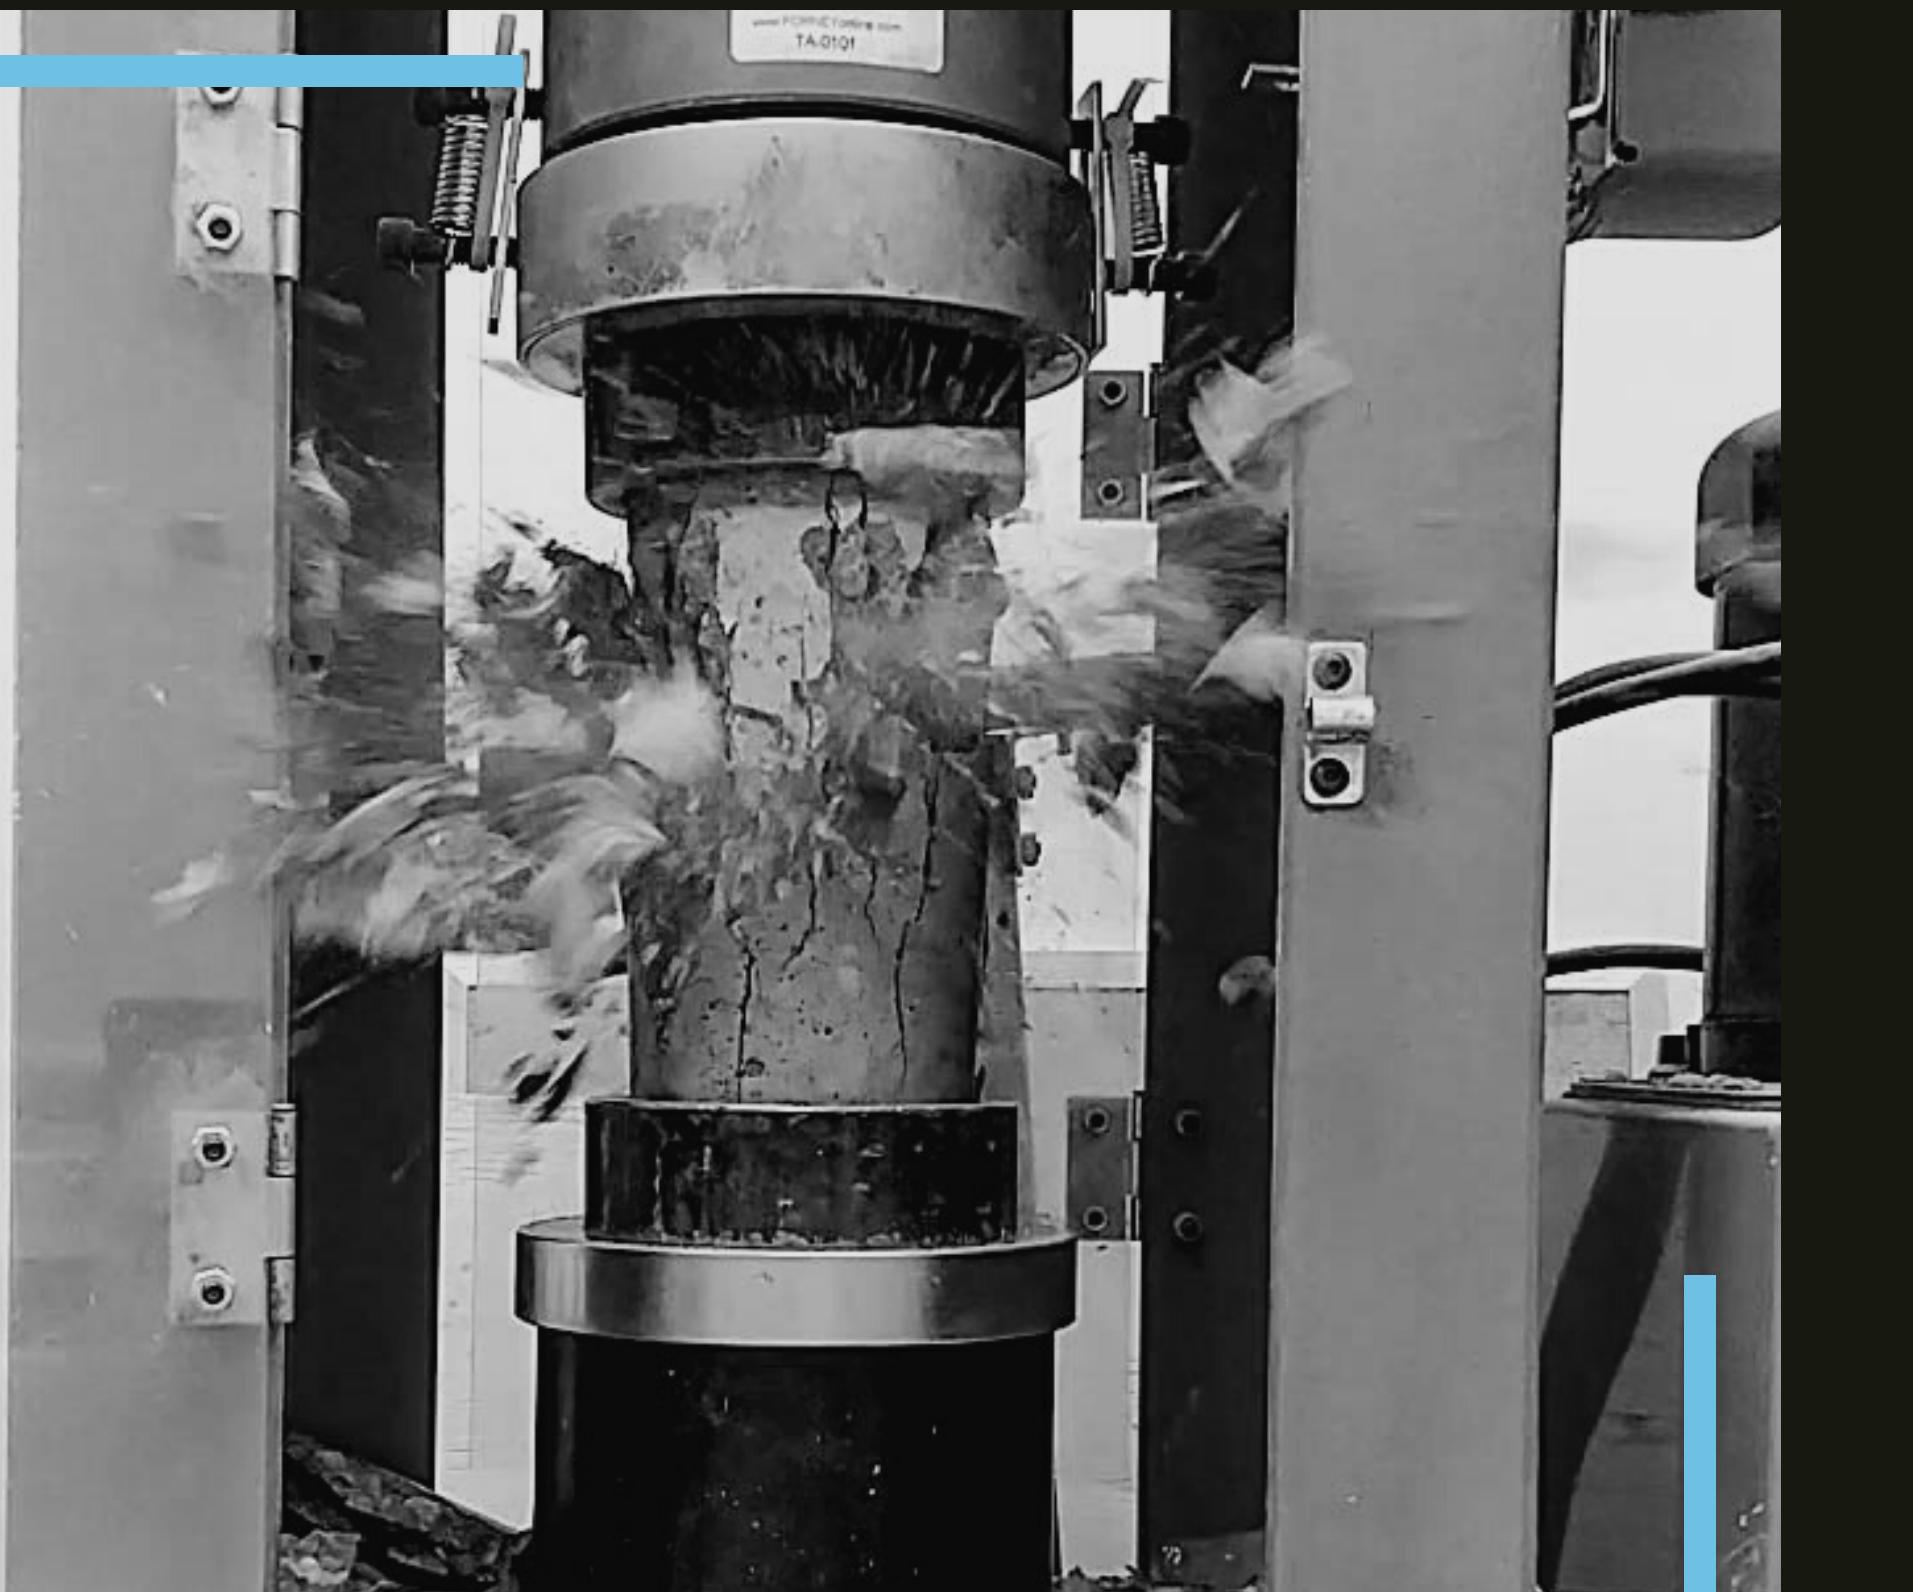

Personal MPa

Concrete strength is measured in Megapascals (**MPa**). The compressive strength of concrete is a measure of its ability to resist the load **forced** upon it. Once cured, test cylinders taken during the concrete pour are mechanically **crushed** to determine the concretes ultimate **MPa**.

STRENGTHEN OR FRACTURE

Question: Is your foundation strong enough to build the the future you want?

If we want more, we must become more, and our first step must be to **strengthen** our inner foundation ready to bear the weight of the person we're going to become.

Weak foundations **fracture**, and eventually fail when overloaded. Engineering your personal **MPa** strengthens your inner world, so you can conquer your outer world.

'Vincit Qvi Se Vincit' Latin translation: He conquers who conquers himself.

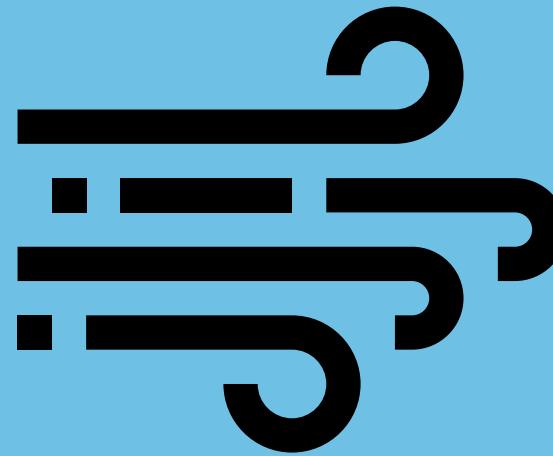

ARCHITECTS & ENGINEERS

Personal **MPa** Mix-Design Elements & Factors:

- **Air**
- **Sand**
- **Water**
- **Cement**
- **Aggregate**

-Production
-Environment
-Quality Control

We must **conquer** Five Personal elements and
Three Factors to become the **Architects** of our
future and **Engineer** our Personal MPa.
